

PARTNERSHIP PROGRAM

Edible Gardens

We believe that everyone has a green thumb, whether you've discovered it yet or not! RUSU's Edible Gardens are in need of some love so we are getting together a wonderful group of students who are passionate about growing healthy and delicious food on campus. The team plan to meet up to get the gardens into shape and plant some herbs, veggies and fruits for our students to take home and use. RUSU Sustainability Department plan, plant, maintain and harvest the crops that are planted in the gardens.

We are looking for donation of garden items and supplies from seedlings, herbs, easy pick vegetables, soil and more. In return for your generous donation we are happy to promote this partnership and inform students through our email campaigns and Instagram posts.

On campus
planter boxes
Accessible to all
students

Grow vegetables and
herbs on campus

In kind donations - gratefully accepted.

For large/ongoing donations of in-kind products contact us to discuss how RUSU can assist promote your product/brand.
